Education

•Indian Institute Of Information Technology, Ranchi

2022-26

B.Tech (ECE)

Experience

•Exaltride

Jan 2026 - Present

Frontend Developer Intern

remote

- Developed and shipped the MVP UI for ExaltRide using **modern frontend technologies**, translating detailed Figma designs into **responsive, accessible, and production-ready components** aligned with product requirements.
- Integrated and optimized multiple **RESTful APIs**, implementing **secure authentication flows**, dynamic data rendering, efficient **state management**, and comprehensive error handling to ensure a seamless user experience.
- Improved frontend performance by **35%** through a **reusable component architecture**, strategic **code splitting and lazy loading**, and responsive optimization across mobile and desktop platforms.
- Collaborated with backend engineers and product stakeholders to define requirements, iterate on features, and deliver **high-quality functionality within tight timelines**, contributing directly to the **successful MVP launch**.

•Qorvia Technologies

June 2025 - Aug 2025

Full Stack Developer Intern

remote

- Built a **Property Management SaaS platform from the ground up**, centralizing rental, maintenance, and administrative workflows into a **unified and scalable interface**.
- Designed and implemented **role-based dashboards** for tenants, landlords, and maintainers, improving navigation clarity and increasing task efficiency by **25% across property operations**.
- Integrated **Mapbox-powered geolocation services**, driving a **95% improvement in location input accuracy** and enhancing data reliability across **200+ managed property records**.
- Developed **automated data export pipelines** (PDF, Excel, clipboard), reducing manual processing time by **40%** and enabling efficient, cross-stakeholder data sharing.

Personal Projects

•Weavy.ai | Live Demo | Github Code

Tech Stack:Next.js,TypeScript,React Flow,PostgreSQL,Trigger.dev,FFmpeg

- Built a **node-based AI workflow builder** using **React, Next.js, and React Flow**, enabling **drag-and-drop pipeline creation** with dynamic node connections; implemented **6+ custom node types** and interactive graph editing for visually designing complex AI pipelines.
- Designed a **DAG-based workflow execution engine** that performs **graph validation, dependency resolution, and topological sorting**, ensuring correct execution.
- Implemented **parallel execution of independent workflow nodes** using **Trigger.dev background jobs**, enabling **concurrent task processing** and reducing overall workflow execution time by **up to 50%** compared to sequential execution.
- Developed a **media processing pipeline** using **FFmpeg** to support **video frame extraction and image cropping**, automatically integrating processed media into workflows for downstream AI tasks.

•KrishiBazar | Live Demo | Github Code

Tech Stack:React js,Node js,Tailwind CSS,Zustand,Mongodb

- Designed and developed a **full-stack Marketplace** using **React, Node.js, Express, and MongoDB**, supporting end-to-end user flows from product discovery to order fulfillment.
- Implemented **secure authentication, role-based authorization, and cart management**, enabling **100+ successful user sessions** with consistent data integrity.
- Integrated **Razorpay payment gateway and order confirmation email system**, achieving **reliable transaction processing** with **zero payment failures** during test cycles.
- Built **scalable RESTful APIs** and optimized frontend performance through reusable components, reducing **feature development time by 30%** and improving overall maintainability.

Technical Skills and Interests

Languages:C++, Python, JavaScript,Typescript

Cloud/Databases:MongoDB, MySQL, PostgreSQL, AWS(EC2,S3)

Frameworks/Technologies:Next.js, React.js, React Query, Node.js, Express.js, Tailwind CSS, Redux

Developer Tools:Git, GitHub, VS Code, Postman, Docker

Achievements

Achieved a **rating of 1710**, demonstrating proficiency in data structures and algorithms.

Solved **500+ DSA problems** on multiple platforms like Leetcode, GeeksforGeeks, etc.

Achieved **32nd place out of 250** participants in the Algo University college programming competition.
